Subject: FW: Final Cape Cod BMP Task 1 Summary Memo
Attachments: Final Cape Cod BMPs Task 1 Summary Memo 2015-02-17.pdf; 60% Design for Permitting, Barnstable.pdf; Barnstable Aerial.pdf; Surface Treatment Planting Options.pdf

Dale, Roger,

I trust the weather is keeping us all busy these days. i can no longer see my fence posts . . .

attached is a finalized version of the Task 1 Summary Memo (T1SM) for the project. since that time of course, our contractors have developed and provided you with 60% design plans and some other info which i hope and trust are satisfactory for your needs. i'm attaching these again for your convenience.

it appears finalization of the T1SM focused on incorporating answers to EPA comments (pp. 33-45), providing an updated schedule (p. 32) and identifying / reserving certain substantive matters for the final design, including matters identified by our comments.

note that questions / items from the University of New Hampshire Stormwater Center (UNHSC) and perhaps some of your own comments have not been incorporated as of yet. however, again, many of your comments / concerns have already been incorporated into updated design plans, as they are needed / intended for presentation before the local Con Com for Mass Wetlands Act permitting (a critical path scheduling item).

Task 1 of our project is now complete and it is full steam ahead (as possible under the circumstances) for a final design. notably, the revised schedule provided (p. 32) contemplates construction in Barnstable occurring as early as Mar. 8!, assuming all goes according to plan in the meanwhile (e.g., Mass Wetlands Act permitting. see generally, answer to question #35, p. 43).

let me know if you may have any questions or concerns . . .
